

Watt's New

Solar updates, industry news, and more

Welcome back to Watt's New!

This month, we're proud to share some exciting news — and a big thank you to the community that continues to support Solos Energy. We've also included a quick look at what truly sets a great solar installation apart, and why quality matters when making the switch to solar.

Solos Energy Named Consumer Choice Award Winner—Again

Winning once is an honour. Winning twice is a testament.

We're proud to share that Solos Energy has been named a Consumer Choice Award winner for 2026, marking our second year in a row receiving this recognition in Kelowna & the Greater Region.

'Consumer Choice Award has been recognizing and promoting business excellence in North America since 1987. We're proud to award Solos Energy as a Consumer Choice Award Recipient in Kelowna & Greater Region.'

This recognition means a lot, because it reflects the experiences of our customers and the trust they place in our team. Thank you to our incredible customers for your support and trust, and to the Solos team for continuing to deliver five-star service every step of the way.

Nominations Now Open: Best of Kelowna & Penticton 2026

It's that time again — nominations are open for Best of Kelowna and Best of Penticton 2026! If you've had a great experience with Solos Energy, we'd be incredibly grateful for your nomination. You can find us under the Home & Garden section in Best Solar Installation Category.

Nominations close April 13 — thank you for your continued support!

What Sets a Great Solar Installation Apart? And What Sets Solos Energy Apart

Not all solar systems — or solar companies — are created equal. While many systems will generate power, the quality of design, equipment, and installation plays a major role in how well your system performs over time. Choosing the right team ensures your investment delivers reliable energy and long-term value for decades.

At Solos Energy, we've built our approach around doing things the right way — with a focus on quality, transparency, and long-term performance.

Thoughtful, Custom System Design

Every home and business is different, and your solar system should be too. We take the time to understand your energy usage, roof layout, and long-term goals to design a system that fits your needs today and into the future. No cookie-cutter solutions, just smart, tailored designs that maximize performance.

High-Quality Equipment That Lasts

Your solar system is a long-term investment, typically 25–30 years, so both the equipment and the team behind it matter.

That's why we use only proven, high-performance technology backed by industry-leading warranties, ensuring durability, efficiency, and long-term peace of mind. Your system is built to continue producing clean energy year after year, with the confidence that it's protected for the long haul.

It's not just about installing panels, it's about building a system that performs reliably, delivers real savings, and stands the test of time.

Expert Installation You Can Trust

Installation quality has a direct impact on system performance and safety. Our team is experienced, detail-oriented, and committed to getting every installation right. We take pride in clean workmanship, proper system configuration, and building systems that are made to last. We're also proud to be NABCEP certified, the gold standard in the solar industry, giving you added confidence that your system is being designed and installed to the highest professional standards.

Ongoing Support & Monitoring

Our relationship doesn't end after installation. In fact, that's just the beginning! We monitor all of our solar installations for their lifetime, so you can feel confident knowing your system's performance is always being looked after. And if anything ever needs attention, our team is here to help. Solar is a long-term investment, and we're committed to supporting every customer and ensuring each system continues to perform reliably and deliver lasting value.

A local team you can count on

As a locally owned and operated company, we understand the unique needs of homeowners and businesses in the Okanagan and Alberta. From climate considerations to local utilities, permitting, and building requirements. Being local means we're not just here for the installation, we're here before, during, and long after your system is up and running. Our team is part of the community, and we take pride in building lasting relationships with the people we work with. We're committed to honest communication, clear guidance, and delivering a smooth, stress-free experience from start to finish. When you work with Solos Energy, you're working with a team that's accessible, accountable, and invested in doing the job right.

That's a wrap!

Stay tuned for the next edition of Watt's New.
